Personal Project

Copenhagen, Denmark

- **Problem Identification:** Recognized that traditional resumes often lead to hiring bias, preventing talented candidates from getting interviews.
- **Solution Strategy:** Designed and launched a "Proof-over-Resume" platform where candidates demonstrate skills through "Proof Tasks," shifting the focus from history to ability.
- **Product Features:** Prioritized and implemented a Kanban-style talent manager for employers to streamline the recruitment workflow and improve real-time tracking.

Satoshi Standard

Aug 2025 - Sep 2025

Personal Project

Copenhagen, Denmark

- **Real-time Crypto Conversion:** Developed a web application using React and the CoinGecko API that converts the price of everyday items into Bitcoin Satoshis (sats) across multiple global currencies.
- **Persistent Data Management:** Built a personal list feature with local storage that allows users to save, edit, and sort items while automatically calculating the total value in both Bitcoin and local money.
- **Historical Price Insights:** Created an interactive history tool with visual charts using Chart.js that compares current prices to historical data, helping users track how the value of goods changes in Bitcoin terms over time.
