# Taninwat Kaewpankan

**Full-stack Engineer**

Copenhagen, Denmark · taninwat.kaewpankan@gmail.com · linkedin.com/in/taninwat-k-ice2539 · github.com/Taninwat-55 · taninwatkaewpankan.xyz

## SUMMARY

TypeScript engineer working across Next.js and PostgreSQL. Part-time on the frontend at Trailr AI, an early-stage startup doing AI video analysis for Danish media, where work starts from a rough brief rather than a spec. In my own products I own the database too, from schema and migrations to row-level security, and I design AI features so the model suggests and a person decides. Learning C through CS50x alongside a self-set plan to become a full-stack TypeScript engineer.

## SKILLS

| | |
|---|---|
| **Languages** | TypeScript, JavaScript, SQL, HTML5, CSS3 |
| **Frontend** | Next.js (Server Components, Server Actions), React, TailwindCSS, Zustand, Accessibility (WCAG) |
| **Backend & Databases** | PostgreSQL (schema design, migrations, indexes, row-level security), Prisma, Supabase, Node.js, REST APIs |
| **Tools & AI** | Agentic coding (Claude Code, custom review agents), LLM integration (Gemini), Git/GitHub, Vitest, CI/CD (GitHub Actions), Vercel, Figma |
| **Operations & Product** | Product Development, Client Relations, Recruitment & Onboarding, Requirements Gathering, Process Design, Stakeholder Communication, Agile / Scrum, Cross-functional Collaboration |

## PROJECTS

### Bevisly

Aug 2025 – Present

*Personal Project (React, TypeScript, Tailwind, Supabase, Vitest) · Copenhagen, Denmark*

- A hiring platform built solo, where candidates prove their skills with real tasks instead of CVs, with separate flows for candidates, employers and admins.
- 63 PostgreSQL migrations so far, covering row-level security per role, triggers and SQL scoring functions, with the schema changed step by step as the product moved.
- AI grades used to feed the public score employers see. A rewrite in October 2026 made that score count employer judgement only and kept the Gemini grade as private feedback for the candidate, in line with the EU AI Act.

### MockMate

May 2026 – Present

*Personal Project (Next.js 16, Server Actions, Neon PostgreSQL, Prisma) · Copenhagen, Denmark*

- An AI interview practice tool where candidates rehearse real interviews and get feedback, born from my own job search.
- Evaluation runs in two passes. The live interview stays conversational, while a separate grading pass reads only summarized notes, not the raw answers, which keeps scores consistent and closes a prompt injection risk.
- Each answer is scored on technical accuracy, clarity and problem solving, with one strength, one weakness and one concrete tip per area.
- Composite indexes chosen for the real query paths, for example the cleanup job that finds stale interview sessions.

## EXPERIENCE

### Trailr AI
Sep 2025 – Present

*Frontend Developer (Intern → Part-time) · Remote, Denmark*

- Most work arrives as rough briefs with no formal specs, so the job is reading the intent, flagging feasibility gaps early and checking with the backend team before building.
- Part of a small remote team where product, design and engineering overlap, working on the trailer report, the back office and the platform's tools in React and TypeScript.
- A full overhaul of the navigation UI inside an existing Zustand codebase, reworking state connections and wiring components to new design requirements.
- A shared side-panel layout across tools like Story Builder and Screening Room, so each new tool starts from the same structure.
- The platform is in enterprise trials with two major Danish media companies.

### Millennial Consulting
Sep 2023 – May 2025

*Operations Assistant → Operations Manager → Head of Organization (Volunteer) · Copenhagen, Denmark*

- 20+ client engagements across 4 cycles, with 90%+ client satisfaction each time.

## EDUCATION

### Jensen Yrkeshögskola
Aug 2024 – May 2026

Higher Vocational Education Diploma, Frontend Developer (2-year program), passed with distinction in 8 of 12 courses · Malmö, Sweden

### Uppsala University
Aug 2022 – Jun 2023

Magister (one-year master's) in Entrepreneurship · Uppsala, Sweden

### Uppsala University
Aug 2019 – Jun 2022

BA in Game Design and Project Management · Uppsala, Sweden

## ADDITIONAL

| | |
|---|---|
| **Certificates** | Google Project Management Certificate |
| **Languages** | Thai (Native), English (Fluent), Swedish (Fluent), Danish (Basic) |
| **Work authorization** | EU citizen with full right to work in Denmark and across the EU, no sponsorship needed |
