

Taninwat Kaewpankan

Full-stack Engineer

Copenhagen, Denmark · taninwat.kaewpankan@gmail.com · [linkedin.com/in/taninwat-k-ice2539](https://www.linkedin.com/in/taninwat-k-ice2539) · github.com/Taninwat-55 · taninwatkaewpankan.xyz

SUMMARY

I build web apps, mostly with React, Next.js and TypeScript. At Trailr AI I led a redesign of the platform, keeping it within what the existing backend could support. In my own projects I build the backend too, with Node.js, PostgreSQL and Supabase. Before that, I spent four cycles at Millennial Consulting, going from Operations Assistant to Head of Organization and coordinating around 20 client projects with no full-time staff. I like building things, and I like getting them shipped.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, HTML5, CSS3
Frontend	React, Next.js, TailwindCSS, Zustand, Redux, Responsive Design, Accessibility (WCAG)
Backend & Databases	Node.js, Express.js, REST APIs, PostgreSQL, Authentication & Authorization (JWT/OAuth)
Tools & AI	Git/GitHub, Vitest, CI/CD (GitHub Actions), Claude Code, AI Prototyping, Webflow, Framer
Operations & Product	Client Relations, Recruitment & Onboarding, Requirements Gathering, Process Design, Stakeholder Communication, Agile / Scrum, Cross-functional Collaboration

PROJECTS

Bevisly

Aug 2025 – Present

Personal Project (React, TypeScript, Tailwind, Supabase, Vitest) · Copenhagen, Denmark

- Built a full hiring platform alone: employers post roles, candidates prove skills with real tasks, AI grades the work and drafts job listings.
- Designed both sides of the product, the employer flow and the candidate flow, so I know what each side needs to trust the process.

MockMate

May 2026 – Present

Personal Project (Next.js, Neon PostgreSQL + Prisma, Tailwind) · Copenhagen, Denmark

- Built an AI interview practice tool where candidates rehearse real interviews and get feedback, born from my own job search.
- Designed a two-pass evaluation flow: the live interview stays conversational, while a separate grading pass reads only summarized notes, not the raw answers, keeping scores consistent and closing a prompt injection risk.
- Developed structured feedback scoring so each answer is graded on technical accuracy, clarity, and problem-solving, with one strength, one weakness, and one concrete tip per area.

EXPERIENCE

Trailr AI

Sep 2025 – Present

Frontend Developer (Intern → Part-time) · Remote, Denmark

- Working within an existing React + Zustand codebase, I took on a full overhaul of the platform's navigation UI, reworking state connections and wiring components to fit new design requirements.
- Most work arrived as rough briefs with no formal specs; I'd interpret the intent, flag feasibility gaps early, and work toward components that matched what the team had in mind.
- Collaborated across a small remote team where product, design, and engineering often overlapped.
- The platform secured enterprise trials with Nordisk Film and DR during this period.

Millennial Consulting

Sep 2023 – May 2025

Operations Assistant → Operations Manager → Head of Organization (Volunteer) · Copenhagen, Denmark

- 20+ client engagements across 4 cycles, 90%+ satisfaction each time.
- ~5 projects and over 25 student consultants per cycle.
- Partner workshops with Deloitte, Accenture, EY-Parthenon, PwC, BearingPoint, and Round.
- Kept every cycle fully staffed in an all-volunteer organisation where anyone could walk away at any time, owning recruitment, onboarding, and staffing teams to projects, with no full-time staff to fall back on.

EDUCATION

Uppsala University

Aug 2019 – Jun 2022

BA in Game Design and Project Management · Uppsala, Sweden

Uppsala University

Aug 2022 – Jun 2023

MSc in Business and Management — Entrepreneurship · Uppsala, Sweden

Jensen Yrkeshögskola

Aug 2024 – May 2026

Higher Vocational Diploma in Frontend Development (2-year program) · Malmö, Sweden

ADDITIONAL

Certificates

Google Project Management Certificate

Languages

Thai (Native), English (Fluent), Swedish (Fluent), Danish (Beginner)

Work authorization

EU citizen — full right to work in Denmark and across the EU
