A Product Manager who focuses on turning user needs into successful products. My background in business and game design helps me understand how to build tools that are both useful for a company and easy for people to use.

Areas of expertise:

Market & Competitor Analysis | Stakeholder Management | Unit Economics | Cross Functional Collaboration | Agile/Scrum Methodologies | User Journey Mapping | User Centric & Empathy | React | Node.js | Next.js | API Integrations | System Architecture | UI/UX | Prototyping (Figma) | User Research | Version Control | Adaptability

Experience:

Trailr-AI

Sep 2025 - Dec 2025

Frontend Developer Intern

Remote

- **User-Centric Design System:** Spearheaded a platform-wide UI/UX overhaul, translating user research and journey maps into a scalable design system that improved cross-functional design-to-code efficiency.
- **Stakeholder Alignment:** Acted as the bridge between design vision and technical constraints, managing the roadmap for four major feature integrations to ensure 100% on-time deployment.
- **Product Strategy & AI Validation:** Leading the development of a Human Validation Tool to capture user sentiment data, directly informing the training requirements for the core AI model.
- **Workflow Innovation:** Defined the requirements for a "Lego Box" AI interface, replacing complex video timelines with an intuitive, non-linear workflow to reduce editor clip-finding time by 50%.

Bevisly

Aug 2025 - Sep 2025

Personal Project

Copenhagen, Denmark

- **Problem Identification:** Recognized that traditional resumes often lead to hiring bias, preventing talented candidates from getting interviews.
- **Solution Strategy:** Designed and launched a "Proof-over-Resume" platform where candidates demonstrate skills through "Proof Tasks," shifting the focus from history to ability.
- **Product Features:** Prioritized and implemented a Kanban-style talent manager for employers to streamline the recruitment workflow and improve real-time tracking.

Satoshi Standard

Aug 2025 - Sep 2025

Personal Project

Copenhagen, Denmark

- **Real-time Crypto Conversion:** Developed a web application using React and the CoinGecko API that converts the price of everyday items into Bitcoin Satoshis (sats) across multiple global currencies.
- **Persistent Data Management:** Built a personal list feature with local storage that allows users to save, edit, and sort items while automatically calculating the total value in both Bitcoin and local money.
- **Historical Price Insights:** Created an interactive history tool with visual charts using Chart.js that compares current prices to historical data, helping users track how the value of goods changes in Bitcoin terms over time.

Millennial Consulting

Sep 2023 - May 2025

Curriculum Vitae

Head of Millennial Consulting, Volunteer

Copenhagen, Denmark

- Directed end-to-end project lifecycles for diverse clients, achieving a 90%+ client satisfaction rate and 100% on-time delivery.
