Taninwat Kaewpankan

Full-stack Engineer

Copenhagen, Denmark · taninwat.kaewpankan@gmail.com · linkedin.com/in/taninwat-k-ice2539 · github.com/Taninwat-55 · taninwatkaewpankan.xyz

SUMMARY

Full-stack engineer working mostly in TypeScript, React and Next.js. At Trailr AI, an early-stage AI video startup, I work part-time on the React frontend and led a redesign of the platform's UI within what the existing backend supports. In my own products I build the backend too, with Node.js, REST APIs and PostgreSQL, and add LLM features where a person keeps the final say. I use AI-assisted development every day and check the result with tests and CI before it ships.

SKILLS

Languages	TypeScript, JavaScript, SQL, HTML, CSS
Frontend	React, Next.js, Accessibility (WCAG), Web performance (Core Web Vitals)
Backend	Node.js, REST APIs, PostgreSQL, Supabase
AI and tools	LLM integration (Gemini), AI-assisted development (Claude Code, review agents), Git, CI/CD (GitHub Actions), Testing (Vitest)

PROJECTS

Bevisly

Aug 2025 – Present

Personal Project (React, TypeScript, React Router, Supabase, PostgreSQL, Vitest) · Copenhagen, Denmark

- Proof pages for web freelancers with real work and no reviews yet. Each project is confirmed by the client who paid for it, through a link the freelancer sends.
- 72 PostgreSQL migrations so far, with access rules per role, triggers and SQL functions.
- Public pages prerendered to HTML, built to a budget of about 100 KB of JavaScript and Core Web Vitals targets.

MockMate

May 2026 – Present

Personal Project (Next.js, TypeScript, PostgreSQL, Prisma, Gemini) · Copenhagen, Denmark

- An AI interview practice tool, live at mockmate.space. Candidates paste a job ad, rehearse a tailored interview and get graded the way a hiring panel would.
- The LLM grades in a separate pass that reads only summarized notes, not the raw answers, which keeps scores consistent and closes a prompt injection risk.
- Composite indexes chosen for the real query paths, for example the cleanup job that finds stale interview sessions.

Concept websites (Lumina, Saep, Første Lys)

Aug 2026 – Present

Personal Projects (HTML, CSS, JavaScript) · Copenhagen, Denmark

- Three sites for invented Copenhagen businesses, each built around one scroll-driven moment, at 11 to 14 KB of page code gzipped.
- Each site works in full with reduced motion or without JavaScript, and each form says exactly what to fix.

EXPERIENCE

Trailr AI
Sep 2025 – Present

Frontend Developer (Intern → Part-time) · Remote, Denmark

- Part of a small remote team where product, design and engineering overlap, working on the trailer report, the back office and the platform's tools in React and TypeScript.
- A redesign of Story Builder and the platform navigation, scoped to what the existing backend already supports, with state reworked inside the existing Zustand store.
- Most work arrives as rough briefs with no formal specs, so the job is reading the intent, flagging feasibility gaps early and checking with the backend team before building.
- The platform is in enterprise trials with two major Danish media companies.

Freelance
Jun 2025 – Present

Web Developer · Copenhagen, Denmark

- Racha Beauty, a paying client's first website. A Danish-language React site with a 95+ Lighthouse score and a contact form with a fallback path.

Millennial Consulting
Sep 2023 – May 2025

Operations Assistant → Operations Manager → Head of Organization (Volunteer) · Copenhagen, Denmark

- 20+ client engagements across 4 cycles, with 90%+ client satisfaction each time.
- Around 5 projects and 25+ student consultants per cycle, all volunteers, with recruitment, onboarding and team staffing as my responsibility.
- A hybrid Agile and waterfall process of my design, later adopted across the organisation.

EDUCATION

Jensen Yrkeshögskola
Aug 2024 – May 2026

Higher Vocational Education Diploma, Frontend Developer (2-year program), passed with distinction in 8 of 12 courses · Malmö, Sweden

Uppsala University
Aug 2022 – Jun 2023

Master of Social Science (one year, 60 credits), Entrepreneurship · Uppsala, Sweden

Uppsala University
Aug 2019 – Jun 2022

Bachelor of Arts, Game Design · Uppsala, Sweden

ADDITIONAL

Languages	Thai (Native), English (Fluent), Swedish (Fluent), Danish (Intermediate, B1, studying)
Work authorization	EU citizen with full right to work in Denmark and across the EU, no sponsorship needed
