SUMMARY

I build web apps, mostly with React, Next.js and TypeScript. At Trailr AI, an early-stage AI startup, I work part-time on the frontend and UI/UX, and I led a redesign of the platform within what the existing backend could support. In my own projects I build the backend too, with Node.js, PostgreSQL and Supabase, including AI features on Gemini where a person keeps the final say. Before that, I spent four cycles at Millennial Consulting, going from Operations Assistant to Head of Organization and coordinating around 20 client projects with no full-time staff. I like building things, and I like getting them shipped.

SKILLS

Languages	TypeScript, JavaScript, SQL, HTML5, CSS3
Frontend	React, Next.js, TailwindCSS, Zustand, Redux, Responsive Design, Accessibility (WCAG)
Backend & Databases	Node.js, Express.js, REST APIs, PostgreSQL, Supabase, Prisma, Authentication & Authorization (JWT/OAuth)
Tools & AI	Git/GitHub, Vitest, CI/CD (GitHub Actions), Vercel, Figma, LLM integration (Gemini), Claude Code
Operations & Product	Product Development, Client Relations, Recruitment & Onboarding, Requirements Gathering, Process Design, Stakeholder Communication, Agile / Scrum, Cross-functional Collaboration

PROJECTS

Bevisly

Aug 2025 – Present

Personal Project (React, TypeScript, Tailwind, Supabase, Vitest) · Copenhagen, Denmark

- A hiring platform built solo, where candidates prove their skills with real tasks instead of CVs, with separate flows for candidates, employers and admins.
- Row-level security and role-based access in Supabase from the start, so each role only sees its own data.
- Gemini runs in Supabase Edge Functions to suggest a score for each submission and draft job listings. The employer makes the final call, in line with the EU AI Act.

MockMate

May 2026 – Present

Personal Project (Next.js, Neon PostgreSQL + Prisma, Tailwind) · Copenhagen, Denmark

- An AI interview practice tool where candidates rehearse real interviews and get feedback, born from my own job search.
- Evaluation runs in two passes. The live interview stays conversational, while a separate grading pass reads only summarized notes, not the raw answers, which keeps scores consistent and closes a prompt injection risk.
- Each answer is scored on technical accuracy, clarity and problem solving, with one strength, one weakness and one concrete tip per area.

EXPERIENCE

Trailr AI
Sep 2025 – Present

Frontend Developer (Intern → Part-time) · Remote, Denmark

- Part of a small remote team where product, design and engineering overlap, working on the trailer report, the back office and the platform's tools in React and TypeScript.
- A full overhaul of the navigation UI inside an existing Zustand codebase, reworking state connections and wiring components to new design requirements.
- A shared side-panel layout across tools like Story Builder and Screening Room, so each new tool starts from the same structure.
- Most work arrives as rough briefs with no formal specs, so the job is reading the intent, flagging feasibility gaps early and checking with the backend team before building.
- The platform is in enterprise trials with two major Danish media companies.

Millennial Consulting
Sep 2023 – May 2025

Operations Assistant → Operations Manager → Head of Organization (Volunteer) · Copenhagen, Denmark

- 20+ client engagements across 4 cycles, with 90%+ client satisfaction each time.
- Around 5 projects and 25+ student consultants per cycle, all volunteers, with recruitment, onboarding and team staffing as my responsibility.
- A hybrid Agile and waterfall process of my design, with fixed milestones for clients and flexible mentor sessions for teams, later adopted across the organisation.
- Partner workshops with Deloitte, Accenture, EY-Parthenon, PwC, BearingPoint and Round.

EDUCATION

Jensen Yrkeshögskola
Aug 2024 – May 2026

Higher Vocational Education Diploma, Frontend Developer (2-year program), passed with distinction in 8 of 12 courses · Malmö, Sweden

Uppsala University
Aug 2022 – Jun 2023

Master of Social Science (one year, 60 credits), Entrepreneurship · Uppsala, Sweden

Uppsala University
Aug 2019 – Jun 2022

Bachelor of Arts, Game Design · Uppsala, Sweden

ADDITIONAL

Certificates	Google Project Management Certificate
Languages	Thai (Native), English (Fluent), Swedish (Fluent), Danish (Basic)
Work authorization	EU citizen with full right to work in Denmark and across the EU, no sponsorship needed
